

MUDASSAR SHAHEEN

Senior Unity Game Developer | VR/XR Developer

Lahore, Pakistan | +92 332 4754717 | mudassar.cr@gmail.com | mudassar-shaheen-portfolio.vercel.app

PROFESSIONAL SUMMARY

Unity game developer with 6+ years of experience building interactive games across mobile, desktop, and VR. Shipped 20+ titles live on Android and iOS, including playable ads, and delivered production Unity builds spanning AI-powered gameplay, backend-driven multiplayer systems, and immersive VR experiences. Comfortable owning a title end-to-end — gameplay systems, C# backend architecture, and multiplayer networking through UI/UX and performance optimization — with hands-on project leadership experience and growing expertise in Python-based data analysis, machine learning, and AI-assisted development workflows.

CORE SKILLS

Game Development: Unity, C#, Gameplay Systems & Architecture, 2D/3D Development, UI/UX Design, Performance Optimization, Playable Ads

Multiplayer & Backend: Multiplayer Systems & Networking, C# Backend/Server Development, Client-Server Architecture

VR & Platforms: VR Development (Meta Quest), Mobile (Android/iOS), Desktop, Steam Distribution, Hyper-Casual Game Design

AI & Data: AI Integration, Conversational AI/NPC Dialogue Systems, Speech-to-Text, Python, Data Analysis, Machine Learning Fundamentals, n8n Workflow Automation, AI-Assisted Development (Claude Code, MCP)

PROFESSIONAL EXPERIENCE

Senior Unity Developer

Feb 2024 – Present

ArgonTeq — Lahore, Pakistan

- Deliver end-to-end Unity development for a services-based game studio, translating client requirements into shipped, production-ready builds across concurrent engagements.
- Shipped three client engagements: **Wenet**, an AI-powered English-learning game with real-time voice-to-voice NPC conversations (full details under Featured Projects); a blockchain integration using the Solana SDK; and a VR painting application.
- Serving as **Lead Project Developer** on **Zanthalar**, a multiplayer card game — owning both the frontend and a C# backend server, and extending the multiplayer systems originally built at Ingenious Concepts (full details under Featured Projects).
- Leading development of a long-term kids' road-trip game featuring live map-based location tracking, a car customization and car-wash system, and multiple embedded mini-games.

Unity Game Developer

Jan 2020 – Dec 2023

Anabitech — Lahore, Pakistan

- Joined as an early hire at a mixed-reality and promotional-games studio and helped grow the development team from one to three engineers.
- Designed and developed 20+ 2D and 3D games and playable ads for Android and iOS, shipping products across the App Store, Google Play, and major ad networks as part of a hyper-casual and promotional games portfolio.
- Owned gameplay systems, UI/UX, and performance optimization across titles, ensuring consistent quality and fast iteration cycles for client-driven releases.

Unity Game Developer

Mar 2018 – Dec 2019

Ingenious Concepts — Lahore, Pakistan

- Built **Zanthalar**, a real-time multiplayer card game for a UK-based client, working closely with one fellow developer from concept through launch — the foundation for the multiplayer systems I now lead at ArgonTeq (full details under Featured Projects).

FEATURED PROJECTS

Wenet — AI-Powered English Learning Game (Unity 3D)

- Unity 3D game where players hold real-time voice-to-voice conversations with AI-driven NPCs to practice spoken English.
- Built the complete speaking pipeline: voice capture, speech-to-text transcription, AI-based pronunciation scoring, and lip-synced AI-generated NPC replies.
- Developed a backend-driven quiz engine spanning five task types to reinforce learning outcomes.
- Shipped with four-language localization and a dedicated runtime performance optimization pass.
- Tech: Unity3D, C#, Speech-to-Text, Conversational AI/NPC Dialogue Systems, Lip-Sync Animation, Localization.

Zanthalar — Multiplayer Card Game (Unity)

- Originally built in Unity for a UK-based client at Ingenious Concepts (2018–2019), designing core gameplay systems, multiplayer networking, and UI/UX as part of a two-person development team.
- Now leading continued development at ArgonTeq as Lead Project Developer, owning both the frontend and a C# backend server for real-time multiplayer play.
- Delivered a fully polished, production-ready title and continue to extend its multiplayer and backend architecture.
- Tech: Unity3D, C#, C# Backend/Server, Multiplayer Networking, UI/UX Design.

CERTIFICATIONS

Data Analyst with Python — 2023

Data Science & Machine Learning using Python — LUMS, 2022

EDUCATION

BS, Computer Science — University of Punjab, Lahore — 2011 — GPA 3.7

LANGUAGES

Urdu — Native | English — Fluent
