Technical project management
Client delivery & scoping

EDUCATION

BS, Computer Science
University of the Punjab, Lahore
Graduated 2011 · GPA 3.7 / 4.0

CERTIFICATIONS

Data Analyst with Python
2023

Data Science & Machine Learning using Python
LUMS, 2022

LANGUAGES

Urdu — Native
English — Fluent

MUDASSAR SHAHEEN

SENIOR UNITY DEVELOPER · VR & PLAYABLE ADS

SUMMARY

Unity developer with 8+ years building games across mobile, desktop and VR, now also leading client delivery as a Technical Project Manager. Shipped 30+ titles on Android and iOS, including hyper-casual games and playable ads. Comfortable owning a title end to end — gameplay systems and C# architecture through UI/UX, multiplayer and performance optimization — and using AI-assisted workflows to move from prototype to live build fast.

EXPERIENCE

Technical Project Manager

2025 — PRESENT

ArgonTeq · Lahore, Pakistan

- Scope and plan client engagements, coordinate development across the team, and own delivery from architecture through launch.
- Led delivery of Wenet, an AI-powered English-learning game (see Featured Project).
- Led Zanthalar, a real-time multiplayer card game built on Unity with a custom Node.js / Socket.IO backend — matchmaking, persistent profiles and low-latency networking.

Senior Unity Developer

FEB 2024 — 2025

ArgonTeq · Lahore, Pakistan

- Delivered Unity development for a services-based studio, working directly with client requirements on long-running game builds.
- Built a long-term kids' road-trip game with live map-based location tracking, a car wash and customization system, and multiple embedded mini-games.
- Shipped a blockchain integration using the Solana SDK and a VR painting application for Meta Quest.

Unity Game Developer

JAN 2020 — DEC 2023

Anabitech · Lahore, Pakistan

- Joined a mixed-reality and promotional-games studio as an early hire and helped build out its development team.
- Developed 2D and 3D games for Android and iOS, shipping 20+ products across the App Store and Google Play.

Unity Game Developer

MAR 2018 — DEC 2019

Ingenious Concepts · Lahore, Pakistan

- Built a multiplayer card game for a UK-based client, working closely with one fellow developer.

FEATURED PROJECT

Wenet — AI-Powered English Learning Game

Unity 3D game where players hold real-time voice conversations with AI-driven NPCs to practice English. Built the full speaking pipeline — voice capture, speech-to-text, AI pronunciation scoring and lip-synced AI replies — plus a backend-driven quiz engine across five task types. Shipped with four-language localization and a runtime performance pass.

More on the portfolio: Fracture Fables (Steam RPG), Royal Champs, hyper-casual prototypes and Meta Quest interaction demos.
